		Current Bill Amount Due 11/13/2019	\$570.00
		Total Balance Now Due	\$570.00
		Payment Enclosed	

Here's where to find what you need:

- A Account Summary** -- Where you will find your Choptank Electric account number, bill date, prior balance, payments, current bill amount, and total balance due.
- B Readings (From, To)** -- Prior and present readings; date each was taken.
- C Rate** -- The type of billing rate you are being charged. Rate schedules can be located at <https://choptankelectric.com/rates>. "S" rate is General Service -- Small, Rate Schedule S.
- D Usage** -- Amount of kilowatt hours (kWh) consumed before the billing multiplier.
- E Multiplier** -- For some meters, the actual amount of power used is too large to be registered through the meter; as a result, the meter displays a fraction of the actual use. A multiplier is applied to the difference between your present and previous readings to calculate your actual energy use.
- F Billed Usage** -- The actual kWh consumed after the multiplier is applied.
- G Actual Demand** -- The rate at which energy is consumed. The billing demand (kilowatt) shall be the maximum kilowatt (kW) consumed by the member for any period of fifteen consecutive minutes during the billing month.
- H RKVAH** -- KVARH or reactive energy. If your power factor is less than 90%, you will be billed for KVARH. Actual power consumed by load is called kilowatt power. All the power given to the load is not utilized as useful power. The non-useful power is called reactive power or KVARH.
- I Power Factor** -- The ratio of kilowatt to kilovolt ampere, expressed as a percentage and used to describe the ratio of working or useful power to the apparent power consumed.
- J Choptank Electric Cooperative Delivery Charges** - Charges associated with the delivery of electricity.
- K Consumer Charge** -- This flat charge is designed to recover a portion of the cost of service related to the delivery of electricity to members (ex. poles, wires, transformer, meters).

- L Distribution Charges** -- Designed to recover a portion of the cost of service related to the delivery of electricity to members. These charges are based on energy consumption (kWh), actual demand (kW), and may include Distribution RKVAH.
- M Universal Service** -- This charge, mandated by the state, funds state programs for low-income residential customers.
- N Environmental Surcharge/MD PSC Franchise Tax** -- Surcharges and taxes assessed by the State of Maryland.
- O Sales Tax** -- Sales tax assessed based on your electric bill unless sales tax exemption forms have been received for each account, if applicable.
- P Roundup Contribution** -- The Cooperative's community service assistance program. The Cooperative will "Round-Up" a member's monthly electric bill to the nearest dollar amount unless the member opts out.
- Q Supplier Charges** -- Charges from the energy supplier associated with the generation and transmission of the energy consumed.
- R Generation Charges** -- Charges for the production of the electricity that you use. This includes kW and kWh measurements.
- S Power Cost Adjustment (PCA)** -- Reflects increases or decreases in the fuel cost of purchased power from the Cooperative's wholesale power supplier.
- T Transmission Charges** -- Cost of the delivery of electricity from the generation facility to the Cooperative's facility. This includes kW and kWh measurements.
